Breaking Down Barriers: Summer Academy Takes on Educational Attainment Gap Between Deaf and Hearing Students
By Jackie Lam

Students with hearing loss face unique challenges in school, many of which result in them choosing not to go to or failing to complete college. Summer programs around the country are taking this issue head-on by preparing these students with skills and hope. Read More.

What do Commuters Know About Noise-Induced Hearing Loss?
By Michelle Brady, AuD; Suzanna Miller, PhD; and Yula C. Serpanos, PhD

It’s no surprise that mass transit commuters in big cities are at higher risk of having damaged hearing. The surprising part is how unaware these city dwellers are of this problem and its irreversible consequences. Read More.

Communication Repair Strategies for Hearing-Impaired Children
By Kuei-Ju Lin

Hearing-impaired children require not only the right instrument but also the appropriate communication repair skills like asking for clarifications appropriately to interact with others effectively. Read More.

Why Patients Need Hearing Loops
By Juliette Sterkens, AuD

Hearing loops make up for what the hearing aid alone can't do: They improve patients' ability to understand speech over distance or in noise. Read More.

Counseling Training in AuD Programs: A Syllabi Review
By John J. Whicker; Karen F. Muñoz, EdD; Grayson M. Butcher; Jared C. Schultz, PhD; and Michael P. Twohig, PhD

Counseling is integral to quality hearing health care and patient compliance with treatment, but are AuD programs preparing future clinicians for this important task in their practice? Read More.

Emergency Preparation for People with Hearing Loss

August 8, 2017
Preparation is the best defense in any emergency; Ms. Eberts shares tips on how to draw up an emergency plan tailored to those with hearing loss. Read More.

**LATEST COLUMNS**

**Editorial: Autoimmune Hearing Loss**
By Andrea Vambutas, MD, FACS
Effective diagnosis and treatment of autoimmune inner ear disease and cryopyrin continue to elude researchers, but turning their inquiries towards the biologic mechanisms of these diseases might bring them closer to the answers. Read More.

**Journal Club: Language Matters: Considerations in Measuring Speech Intelligibility**
By Lena L. N. Wong, PhD; Nuzhat Sultana; and Yuan Chen, PhD
Considering the band-importance function in patients of different linguistic backgrounds will help audiologists get a more accurate grasp of how to improve these patients' speech intelligibility. Read More.

**TOT 10: Maximizing Research, Audiology Fundamentals in ANSD Management**
By Joanna Smith, MS, LSLS; Jace Wolfe, PhD; and Sara Neumann, AuD
Auditory neuropathy spectrum disorder can present in different ways and can be hard to diagnose; our TOT 10 columnists discuss the new research that can guide audiologists in tackling this tricky condition in their clinics. Read More.

**Clinical Consultation: Symptom: Asymmetric Hearing Loss**
By Hamid R. Djalilian, MD
A 5-year-old girl with no family history of hearing loss has no measurable hearing on the left side and weak left facial function. What's the diagnosis? Read More.

**Hearing Matters: 6 Steps to Embed RIC Hearing Aids**
By Dennis Colucci, AuD, MA
The coupling of the hearing aid to the ear canal requires careful attention and could result in issues if not done properly. Dr. Colucci details six easy steps for audiologists to complete this delicate process successfully. Read More.
