Virtual Reality: The Next Frontier of Audiology
By John Murphy

Think VR is only for gamers? Think again: This technology has the potential to improve or even reinvent audiology, and several research labs have already demonstrated its application in the field. Read More.

Embracing Robotics for CIs
By Robert F. Labadie, MD, PhD, FACS

Audiologists need to be open to the next breakthroughs to find the best treatment options for their patients, and one of them is robotics. Read More.

Preparing for Relational Audiology: Things I Wish Someone Told Me Before I Started Working in Pediatric Audiology
By Elizabeth Seeliger, AuD; Jessica Dallman; and Leigh Hardin

School equips audiologists with the skills to manage hearing loss, but nothing teaches them how to handle conversations with patients or the complex emotions arising from those interactions. Read More.

Animal-Assisted Interventions in Audiology
By Carlie Driscoll, PhD, and Judy Cawdell-Smith, PhD

Animal-assisted rehabilitation in other areas have shown that contact with other animal species has a positive impact on our health and well-being, and that includes our hearing health. Read More.

Barriers and Opportunities in Rural Hearing Health
By Matthew Bush, MD

Rural residents experience health care disparities, with many ending up with delayed audiology interventions because of socioeconomic and geographic challenges. This study paints a realistic picture of hearing care in remote communities and provides practical ways to improve it. Read More.

Tips for Traveling with Hearing Loss
By Shari Eberts

Share these tips with your patients so they can still take good care of their hearing when they are hundreds or thousands of miles away from home. Read More.

**LATEST COLUMNS**

**Editorial: Hearing Loss and Misunderstandings**
By Patrick Henn, MB, BCH, BAO; Colm O. Tuathaigh, PhD; and Simon Smith, BSc, MSc

Better communication with hearing-impaired patients is key to reducing discharge medication errors, which can have potentially serious consequences, in this population. Read More.

**Journal Club: Diffusion Tensor Imaging of the 'Auditory Connectome'**
By Elliott D. Kozin, MD, and Daniel J. Lee, MD

DTI is a promising tool for assessing the integrity of the complex central auditory pathway and outcome of cochlear implant surgery, making up for the limitations of ABR and CT. Read More.

**Golden Rules: Preventive Care for Dementia and Hearing Loss**
By Barbara E. Weinstein, PhD

Cognitive impairment should go hand in hand with hearing loss when audiologists treat older patients because helping one could help the other. Read More.

**NAL News: Advancing Tinnitus Awareness Through Animation**
By Megan Gilliver, PhD; Jane Sewell, PhD; Siobhan McGinnity; and Elizabeth Beach, PhD

HEARsmart and a few other organizations have launched a unique campaign to promote tinnitus awareness and prevention among those most at risk—musicians. Read More.

**Clinical Consultation: Symptom: Failed Cochlear Implant**
By Hamid R. Djalilian, MD

A 60-year-old woman has an implant for which she has gotten a reimplant and revision, but she continues to get limited benefit from her device. What’s the diagnosis? Read More.

**Audiology Without Borders: Humanitarian Outreach in Otology**
By Richard Wagner, MD

There is a general lack of skilled ear surgeons in developing countries, which the nonprofit Global ENT Outreach has made its mission to address this shortage through education around the world. Read More.

**Hearing Matters: Feel the Vibrations: Understanding the Hearing-Emotion Connection**
By Nina Kraus, PhD, and Travis White-Schwoch

Emotions and hearing are intricately connected, and audiologists can leverage this connection to facilitate auditory therapies and provide better counseling to patients. Read More.
